GERMÁN KÜBER

Senior Backend Engineer — Node.js, Python, .NET & Cloud-Native Systems

Las Palmas, Spain (EU Citizen) — Remote — EU / Americas (UTC-5 to UTC+2) — +34 666 844 731
german.kuber@gmail.com — linkedin.com/in/germankuber — github.com/GermanKuber — germankuber.com

PROFESSIONAL SUMMARY

Senior backend engineer with 15+ years building production systems across **Node.js (TypeScript), Python (FastAPI, LangChain), C# / .NET, and Rust**. Recent hands-on work includes AI / LLM platforms, event-driven microservices, real-time pipelines, and serverless backends on AWS (Lambda, S3, SQS / SNS) and Azure. Comfortable across the full backend stack — REST and GraphQL APIs, async runtimes, distributed messaging (RabbitMQ, Apache Kafka, Azure Service Bus, AWS SNS / SQS), and relational and document databases (PostgreSQL, MySQL, MongoDB, Redis). Strong background in event-driven architecture, microservices, Domain-Driven Design, and clean architectural patterns. Microsoft MVP for 8 consecutive years (Developer Technologies) and Microsoft Certified: Azure Solutions Architect Expert (AZ-305). Works well in cross-functional remote teams, contributes to code review and architecture discussions, and ships with attention to detail and ownership.

CORE EXPERTISE

Backend Languages & Runtimes: Node.js (TypeScript, Express, Fastify, NestJS), Python (FastAPI, async, LangChain), C# / .NET (.NET 6 / 7 / 8 / 9, ASP.NET Core, Entity Framework Core), Rust (tokio, async), SQL

AWS & Cloud Infrastructure: AWS Lambda, S3, SNS, SQS, EventBridge, ECS, RDS, Bedrock; Azure (App Service, Functions, AKS, Service Bus, Cosmos DB, API Management, Entra ID, Key Vault); GCP (Vertex AI); Docker, Kubernetes, Terraform, ARM templates, CI / CD pipelines

APIs & Integration: REST APIs, GraphQL, gRPC, OpenAPI / Swagger, OAuth 2.0 / OIDC, JWT, webhooks, API design at scale

Messaging & Distributed Systems: AWS SNS / SQS, Azure Service Bus, RabbitMQ, Apache Kafka, MassTransit, NServiceBus, event-driven architecture, async runtimes, eventual consistency, retry / dead-letter patterns, distributed transactions

Databases & Storage: PostgreSQL, MySQL (Aurora), MongoDB, Cosmos DB, SQL Server / Azure SQL, Redis (cache, pub-sub, streams), DynamoDB, query optimization, schema design

Architecture Patterns: Microservices, event-driven architecture, Domain-Driven Design (DDD), CQRS, Event Sourcing, Saga patterns, Clean Architecture / Hexagonal, Vertical Slice, serverless patterns, polyglot persistence

Frontend (when needed): React, Next.js, Angular, TypeScript, reusable component libraries

AI / LLM Systems: LLM orchestration (OpenAI, Anthropic, Gemini, AWS Bedrock, Azure OpenAI, Vertex AI), MCP (Model Context Protocol), LangChain, LangGraph, RAG pipelines with vector databases (Pinecone, Chroma, pgvector, Redis), real-time audio pipelines

Observability & DevOps: Prometheus, OpenTelemetry, Application Insights, structured logging, distributed tracing, on-call rotation, post-mortems, CI / CD (GitHub Actions, Azure DevOps), GitOps

Security & Identity: OAuth 2.0 / OIDC, Entra ID (Azure AD), JWT, API security (rate limiting, scopes), Zero Trust principles, OWASP Top 10

Engineering Practices: Code review, mentoring, pair programming, technical interviewing, ADRs, design reviews, async remote collaboration

PROFESSIONAL EXPERIENCE

Senior Software Engineer & Co-Founder

KliverAI (Own Venture, closed Apr 2026) — Apr 2025 – Apr 2026 (full-time) — Remote, Spain

- Built and shipped backend services across Node.js (TypeScript) and Python (FastAPI, async) integrating multiple LLM providers (OpenAI, Anthropic, Google Gemini) through direct APIs and managed cloud services (AWS Bedrock, Azure OpenAI, Vertex AI).
- Developed event-driven serverless workflows on AWS Lambda with S3, SNS / SQS, and EventBridge for real-time agent pipelines and asynchronous LLM processing.
- Built production RAG pipelines and data stores across Pinecone, Chroma, pgvector, and Redis with semantic search, hybrid retrieval, and reranking strategies.
- Developed real-time audio pipelines integrating OpenAI Realtime API, Deepgram (STT), ElevenLabs (TTS), and SignalR with sub-200ms TTFT across concurrent user sessions.
- Implemented MCP (Model Context Protocol) servers and clients to standardize tool integration across LLM workflows; built performance-critical components in Rust (tokio, async) for the audio and streaming layer.
- Instrumented LLM evaluation and observability with LangSmith, RAGAS, DeepEval, Langfuse, and OpenTelemetry GenAI semantic conventions; ran red-teaming and structured evals to reduce hallucination rates.
- Worked on a polyglot stack (Node.js, Python, .NET, Rust, Kubernetes, AWS); collaborated with a small distributed team of up to 3 engineers, ran code reviews and architectural discussions.

Senior Software Engineer (Part-time)

Rocking Product — Apr 2025 – Nov 2025 (part-time, parallel to KliverAI) — Remote / Buenos Aires

- Built backend features in Node.js / TypeScript, Python (FastAPI, LangChain) and .NET (ASP.NET Core, Entity Framework Core), integrating AI-powered functionality and supporting an 8-person engineering team.
- Helped redesign the platform architecture and led a full-stack migration from a fragmented JavaScript codebase to .NET, modernizing the stack for long-term scalability.
- Optimized cloud infrastructure and LLM usage through semantic caching, prompt compression, and dynamic model selection across providers, cutting combined cloud and API spend by 45%.
- Established code review standards, design review process, and CI / CD pipelines; contributed to engineering rituals and structured feedback practices.

Senior Software Engineer (Distributed Systems)
Borderless Capital / CTF Capital — Aug 2021 – Apr 2025 — Remote

- Built and shipped low-latency distributed systems in Rust (tokio, async) and Python / Cython, designing event-driven pipelines processing $50M+ in daily transactional flow with execution under 10ms.
- Designed and built a production trading bot in .NET (C#), integrating with Rust execution components and Python signal layers; owned its full lifecycle including deployment and operations.
- Owned 24 / 7 production reliability and incident response, including on-call rotation, post-mortems, and observability ownership with Prometheus, OpenTelemetry, and custom telemetry tracking 50+ real-time metrics.
- Built Python / Cython FFI bindings between Rust performance-critical code and higher-level orchestration layers across the trading stack.
- Contributed to code review, technical interviewing, and architectural discussions across distributed systems and blockchain hires.

Senior Software Engineer
Paramo Technology — Aug 2020 – Aug 2021 — Remote / Argentina

- Designed and built event-driven microservices in .NET (C#, ASP.NET Core) for a large-scale online platform handling real-time state, wallet operations, and regulatory reporting with strict consistency requirements.
- Implemented async messaging and event-driven workflows for inter-service communication with eventual consistency patterns across bounded contexts.
- Applied Domain-Driven Design (DDD) — aggregates, value objects, domain events — and CQRS for read / write separation.
- Contributed to technical interviewing and hiring, and to internal training programs on architecture patterns, testing discipline, and operational best practices.

Senior Software Engineer (Full-Stack)
CloudX (Software Consultancy) — Aug 2017 – Aug 2020 — Buenos Aires

- Built microservices backends in Node.js / TypeScript and .NET (C#, ASP.NET) across multiple enterprise product lines using Domain-Driven Design and Clean Architecture / Hexagonal patterns.
- Built reusable Angular and React frontends with shared component libraries and TypeScript across enterprise products.
- Delivered technical training and conference talks to partners and internal engineering teams; collaborated with clients on requirements gathering and technical adoption.

Software Engineer (Angular / .NET)
Majestic Hotel Group — Jan 2014 – Aug 2017 — Argentina

- Built full-stack features in Angular and .NET for internal hotel management platforms; led the migration from AngularJS to Angular 4.
- Refactored backend workflows toward an event-oriented architecture, reducing coupling across integrations.

.NET Web Developer
Plus54 — Aug 2009 – Mar 2014 — Buenos Aires

- Early career: built .NET web applications, internal tooling, and mobile components end-to-end; integrated external APIs with unit testing and reliable data exchange patterns.

KEY ACHIEVEMENTS

Microsoft MVP, Developer Technologies — 8 consecutive years (2017–present), recognized for technical content and community contributions across the .NET and Microsoft ecosystem.

Microsoft Certified: Azure Solutions Architect Expert (AZ-305) — Senior-level Azure architecture credential covering identity, governance, monitoring, data, business continuity, and infrastructure design.

Net-Baires Founder — Founded and grew Argentina's largest .NET developer community to 100K+ members across 10+ years.

80+ International Technical Talks — Conferences and meetups across LATAM and Europe on backend systems, architecture, AI, and software design.

Production Distributed Systems at Borderless — Built Rust and Python pipelines processing $50M+ in daily on-chain flow with execution under 10ms.

Polkadot Builder Program Graduate — Completed Polkadot Blockchain Academy in Lisbon, Portugal (2026).

Microsoft Student Partner — 5 years (2016–2021).

EDUCATION & CERTIFICATIONS

Microsoft Certified: Azure Solutions Architect Expert (AZ-305) — Microsoft

Microsoft Certified: Azure Associate (AZ-104 / AZ-204 level) — Microsoft

Microsoft MVP, Developer Technologies — Feb 2017 – Present (8 consecutive years)

Systems Engineer — Universidad Abierta Interamericana (UAI), Buenos Aires, Argentina (2017–2021)

Polkadot Builder Program — Polkadot Blockchain Academy, Lisbon, Portugal (2026)

OPEN SOURCE & COMMUNITY

Net-Baires (.NET Community) — Founder (2015–present). Argentina's largest .NET developer community, 100K+ members, 10+ years of monthly meetups and conferences.

Patrones Para Mortales — Founder (2020–present). Educational content brand on software design patterns and architecture.

Crypto Para Mortales — Founder (2023–present). Spanish-language blockchain and crypto education conference.

YouTube channel (youtube.com/@germankuber) — technical deep-dives on .NET, AI, software architecture, Rust, and backend systems.

SPOKEN LANGUAGES

Spanish: Native — English: Full Professional Proficiency — daily use in international remote teams
