PROFESSIONAL SUMMARY

Hands-on technical leader with 15+ years building and shipping production systems, recently operating as Co-Founder & Lead Architect (KliverAI, AI training platform) and Fractional CTO (Rocking Product), where I inherited an 8-person engineering team, partnered directly with founders to translate business priorities into roadmap, and delivered a 45% combined cloud and LLM cost reduction through architecture redesign and vendor consolidation. Comfortable across the full leadership stack — technical hiring and team building, ADRs and design review practices, AI build-vs-buy decisions, cloud modernization, technical due diligence, and board-level technical communication — while staying hands-on in **C# / .NET, Node.js / TypeScript, Python, and Rust** codebases. Microsoft MVP for 8 consecutive years (Developer Technologies) and Microsoft Certified: Azure Solutions Architect Expert (AZ-305). Active public communicator with 80+ international talks and Net-Baires (Argentina's largest .NET community, 100K+ members). Best-fit roles: Fractional CTO engagements, Founding CTO / Head of Engineering at Seed–Series A startups, and VP Engineering at small-to-mid technical teams. EU citizen (Spanish nationality) with full authorization to work across the EU/EEA — no visa or sponsorship required — open to self-funded relocation anywhere in the EU.

CORE EXPERTISE

Technical Leadership & Strategy: Technical roadmap, architectural decision records (ADRs), design review practices, build vs buy decisions, vendor evaluation, technical due diligence, AI strategy for non-AI companies, cloud modernization strategy, board-level technical communication, founder partnership

Engineering Team Management: Engineering hiring and technical interviewing, scaling teams (inherited 8, hired more at Rocking; up to 3 at KliverAI; cross-functional teams at Paramo and CloudX), code review standards, structured feedback practices, CI / CD adoption, on-call rotation and incident response, mentoring across senior and junior engineers

Direct Client & Founder Impact: Partnered directly with CEOs and founders to translate business priorities into technical roadmap; led client workshops, technical adoption, and on-site requirements gathering at CloudX; advised on AI build vs buy, LLM provider selection, MCP integration, cost guardrails, and cloud architecture trade-offs

AI Strategy & Production Delivery: Multi-LLM orchestration (OpenAI, Anthropic, Google Gemini, AWS Bedrock, Azure OpenAI, Vertex AI), MCP (Model Context Protocol) servers and clients, RAG pipelines, vector databases, LLM evaluation and observability (LangSmith, RAGAS, Langfuse), real-time AI pipelines, cost optimization (semantic caching, prompt compression, model routing)

Cloud Architecture & Modernization: Microsoft Certified: Azure Solutions Architect Expert (AZ-305). Microsoft Azure (AKS, Service Bus, Cosmos DB, API Management, Entra ID), AWS (Bedrock, Lambda, S3, ECS), GCP (Vertex AI), Docker, Kubernetes, Terraform, ARM templates, CI / CD pipelines, cost optimization, legacy modernization and migration

Software Architecture: Microservices, Domain-Driven Design (DDD), CQRS, Event Sourcing, Saga patterns, Clean Architecture, Hexagonal, Vertical Slice, event-driven architecture, distributed systems, polyglot persistence, .NET (8 / 9, ASP.NET Core, Entity Framework Core), Node.js / TypeScript, Rust (tokio, async), Python (FastAPI, LangChain)

Cost Optimization & Operational Excellence: Cloud spend reduction (45% at Rocking Product through architecture and vendor consolidation), LLM API cost optimization (semantic caching, prompt compression, dynamic model selection), 24 / 7 production reliability ownership, on-call discipline, post-mortems, observability ownership (Prometheus, OpenTelemetry, Application Insights)

Public Communication & Community: 80+ international technical talks across LATAM and Europe (.NET Conf, DevFest, NetCoreConf, vOpen, Global Azure Bootcamp); founder of Net-Baires (100K+ members), Patrones Para Mortales, and Crypto Para Mortales; comfortable representing technical organization to CEO, board, and external stakeholders

Hands-On Engineering: Remains active in production code (C# / .NET, Node.js / TypeScript, Python, Rust); 4+ years production Rust at Borderless (low-latency MEV infrastructure, $50M+ daily on-chain flow, sub-10ms execution); production AI / LLM systems at KliverAI; .NET architecture across regulated and enterprise verticals

PROFESSIONAL EXPERIENCE

Independent AI Consultant — Agent Engineering & Enterprise AI Delivery

Self-employed (autónomo, Spain) — Mar 2026 – Present — Remote, client under NDA

- Forward-deployed AI consultant embedded with an enterprise engineering organization: run discovery with business and technical stakeholders, architect the solution, and own delivery from pilot through production and continuous iteration.
- Advise engineering leadership on AI strategy: which problems are worth solving with agents, how to structure company knowledge so it is consumable by LLMs, and which data matters for long-term decision-making.
- Introduced a Spec-Driven Development (SDD) framework across the delivery process — versioning, testing and distributing reusable agent skills, and measuring the improvement they produce.
- Designed an end-to-end agentic pipeline from company discovery through to production deployment, with targeted human-in-the-loop checkpoints placed to guarantee quality; cut inference cost and latency through semantic caching and dynamic model routing.

Co-Founder & Lead Architect

KliverAI (Own Venture, closed Feb 2026) — Mar 2025 – Feb 2026 (full-time) — Remote, Spain

- Co-founded an AI training platform; owned technical strategy, architectural decisions, technology selection, and 0-to-1 platform delivery end-to-end as senior-most engineer and technical co-founder.
- Hired and led a distributed engineering team of up to 3 engineers; ran technical interviews, made final hiring decisions, set code review standards, and led architectural reviews.
- Defined product technical roadmap in direct partnership with founding team; ran client conversations, technical and commercial, plus demos.
- Led build vs buy decisions across the AI stack: LLM provider mix (OpenAI, Anthropic, Google Gemini, AWS Bedrock, Azure OpenAI, Vertex AI) with dynamic routing to pick the best model per task and cut inference spend.

- Rewrote the real-time layer from app-embedded SignalR to Azure SignalR Service with Redis-backed state, scaling concurrent users by 500% while holding sub-200ms latency on audio pipelines.
- Benchmarked TTS / STT services (ElevenLabs, Deepgram, AssemblyAI, OpenAI Whisper, Play.ht) on latency, cost, and quality — getting latency to 90ms and word accuracy to nearly 95%.
- Architected MCP (Model Context Protocol) servers and clients, real-time voice AI pipelines, and RAG pipelines with hybrid retrieval and reranking.
- Designed a Zero-Knowledge proof system using Noir, Barretenberg, and Garaga on StarkNet for verifiable expert credentials in a decentralized evaluation marketplace.
- Established LLM evaluation and observability stack including red-teaming and structured eval pipelines for hallucination mitigation, faithfulness and correctness scoring.
- Stayed hands-on across the polyglot stack (Node.js / TypeScript, Python, .NET, Rust, Kubernetes, AWS), shipping production code, running code reviews, and unblocking the team technically.

Fractional CTO

Rocking Product — Apr 2025 – Dec 2025 (part-time, parallel to KliverAI) — Remote

- Came in as Fractional CTO to an 8-engineer team and restructured it in the first quarter without stepping away from the code; partnered directly with founders, owning technical strategy, architectural direction, and translation of business priorities into roadmap and delivery.
- Built an image embeddings service (Azure AI Vision and CLIP) to improve product matching across brand comparisons, raising accuracy and lifting the client's revenue by 40%.
- Cut production bugs by 70% through team training and automated processes (testing, CI / CD, code review).
- Delivered 45% combined cloud infrastructure and LLM API cost reduction through architecture redesign, vendor consolidation, semantic caching, prompt compression, and dynamic model selection.
- Designed a reusable base architecture on LangChain and LangGraph with monitoring via Langfuse and LangSmith; migrated the real-time LLM service from OpenAI to Azure AI Foundry for compliance and data retention.
- Introduced Spec-Driven Development (SDD); established ADR process, design review practices, code review standards, structured feedback rituals, and CI / CD pipelines adopted across the engineering organization.
- Ran additional technical hiring, defined the hiring bar, and onboarded engineers into a structured development cadence; ran weekly public-speaking workshops to sharpen team communication and raise the quality of client meetings.
- Proposed and led a full-stack migration from a fragmented JavaScript codebase to .NET (ASP.NET Core, Entity Framework Core, Clean Architecture), modernizing the platform for long-term scalability.
- Remained hands-on in the codebase across architectural decisions, complex refactors, and unblocking technical bottlenecks; modeled the standard of engineering quality for the team.

Lead Software Engineer (Distributed Systems / Blockchain)

Borderless Capital / CTF Capital — Sep 2021 – Mar 2025 — Remote

- Acted as technical lead for production Rust distributed systems processing 10K+ opportunities per day from $50M+ in daily on-chain transactional flow with $100K+ in attributable annual P&L and sub-10ms execution.
- Migrated the system from Python / Cython to Rust and took it to 20x more transactions per second.
- Was the CTO's technical reference on the low-level side, translating complex tech for better strategy and market decisions; ran technical due diligence on 5+ projects that ended up getting funded (architecture, risk, feasibility).
- Owned 24 / 7 production reliability and incident response, including on-call rotation, post-mortems, and observability ownership across trading-critical pipelines.
- Helped build the blockchain team, which grew from 4 to 10 engineers — code review, mentoring, technical interviewing, and architectural decisions.
- Owned architectural decisions across distributed systems, blockchain infrastructure, and the supporting .NET trading bot, partnering with quant and trading stakeholders to align technical roadmap with business outcomes.
- Designed and built a production trading bot in .NET (C#) in parallel with the Rust execution stack, owning its full lifecycle (architecture, deployment, operations) and bridging it with Python signal layers.

Senior Software Architect

Paramo Technology — Oct 2020 – Sep 2021 — Remote

- Owned the end-to-end architecture of a high-traffic online casino (iGaming) platform handling real-time money operations and regulatory reporting, working directly with the CTO.
- Spotted the issues slowing teams down and designed action plans that raised productivity by 40%, measured by features shipped and fewer errors.
- Migrated part of the product to event-driven microservices in .NET; brought in Kubernetes to scale and built automated deploy pipelines; implemented distributed tracing across all services (OpenTelemetry, Application Insights, Datadog).
- Led part of the hiring and designed the technical entry exam; set engineering standards and created internal training programs on architecture patterns (DDD, CQRS, event-driven microservices), testing discipline, and operational best practices.

Software Architect (Client-Facing)

CloudX (Software Consultancy) — Sep 2017 – Oct 2020 — Remote / Buenos Aires (first employee)

- Was the company's first employee; led architecture decisions across several enterprise product lines, designing microservices backends with Domain-Driven Design and full-stack frontends with reusable component libraries; built a distributed system over geospatial data with PostGIS for a UK client.
- Worked directly with clients on-site: led requirements gathering, architecture workshops, technical adoption sessions, and executive briefings.
- Delivered technical training programs and conference talks to partners and internal engineering teams on architecture patterns, DDD, and software design.

Software Architect (Angular / .NET)
Majestic Hotel Group — Jan 2014 – Aug 2017 — Argentina

- Designed and shipped full-stack features in Angular and .NET for hotel management platforms, first as Team Lead and later as architect; led the migration from AngularJS to Angular 2 and redesigned the data model toward an event-oriented architecture, reducing coupling across integrations.

.NET Web Developer
Plus54 — 2011 – 2014 — Buenos Aires (earlier: Acsys 2009–2011, IBM 2008–2009)

- Early career: built .NET web applications, internal tooling, and mobile components end-to-end.

KEY ACHIEVEMENTS

Co-Founder & Lead Architect at KliverAI — Built and led an AI training platform 0-to-1, including team hiring, technical strategy, and end-to-end delivery on a polyglot stack.

Microsoft MVP, Developer Technologies — 8 consecutive years (2017–present), recognized for technical content, community contributions, and public communication across the .NET and Microsoft ecosystem.

Microsoft Certified: Azure Solutions Architect Expert (AZ-305) — Senior-level Azure architecture credential covering identity, governance, monitoring, data, business continuity, and infrastructure design.

45% Combined Cost Reduction at Rocking Product — Delivered as Fractional CTO through cloud infrastructure redesign, vendor consolidation, and LLM API optimization (semantic caching, prompt compression, dynamic model selection).

Production Distributed Systems at Borderless Capital — Acted as technical lead for Rust pipelines processing $50M+ in daily on-chain volume and contributing $100K+ in attributable annual P&L with sub-10ms execution.

Net-Baires Founder — Founded and grew Argentina's largest .NET developer community to 100K+ members across 10+ years.

80+ International Technical Talks — Conferences and meetups across LATAM and Europe on architecture, AI, blockchain, and engineering leadership.

Polkadot Builder Program Graduate — Completed Polkadot Blockchain Academy in Lisbon, Portugal (2026).

Microsoft Student Partner — 5 years (2016–2021).

EDUCATION & CERTIFICATIONS

Microsoft Certified: Azure Solutions Architect Expert (AZ-305) — Microsoft

Microsoft Certified: Azure Associate (AZ-104 / AZ-204 level) — Microsoft

Microsoft MVP, Developer Technologies — Feb 2017 – Present (8 consecutive years)

Polkadot Builder Program — Polkadot Blockchain Academy, Lisbon, Portugal (2026)

Systems Engineer — Universidad Abierta Interamericana (UAI), Buenos Aires, Argentina (2017–2021)

OPEN SOURCE & COMMUNITY LEADERSHIP

Net-Baires (.NET Community) — Founder (2015–present). Argentina's largest .NET developer community, 100K+ members, 10+ years of monthly meetups and conferences.

Patrones Para Mortales — Founder (2020–present). Educational content brand on software design patterns and architecture.

Crypto Para Mortales — Founder (2023–present). Spanish-language blockchain and crypto education conference.

YouTube channel (youtube.com/@germankuber) — technical deep-dives on .NET, Azure, software architecture, AI, blockchain, and Rust.

SPOKEN LANGUAGES

Spanish: Native — English: Full Professional Proficiency — daily use in international remote teams
